UMKC Student Housing | KANSAS CITY, MISSOURI

UMKC/Beacon Hill Student Housing is a 120-unit, four-story apartment building that houses up to 245 students, staff and faculty members for the University of Missouri Kansas City Medical and Dental Schools on Hospital Hill. The project also includes a dedicated parking garage containing approximately 190 parking spaces.

Taliaferro & Browne (T&B) provided civil engineering services including grading, storm sewers, sanitary sewer service connections, and water service connections. T&B also provided landscape architecture services including the outdoor courtyards.

As a part of an adjacent City project, T&B also provided civil engineering and landscape architecture services for the reconstruction of Troost Avenue, and a pedestrian connection from the new Student Housing building to the Hospital Hill Campus.
